

Leisure Line Rear Vent Direct Vent Kit Dimensions And Installation Notes (insert to Installation Manual)

- Flue Inlet is same size as Stove Outlet, the included adapter fits inside both the Stove and Direct Vent
- Self-Tapping screws are needed to secure both the Stove and the Direct Vent to the adapter
- The Vent Outlet is 4 1/8" OD, this is slightly oversized for standard B Pellet Adapters, we currently offer an adapter that will allow fitment until The Direct Vent is modified (next production run)
